PRAXIS

Intelligence in motion.

Brand Playbook v1.0

THE ORIGIN

Every enterprise drowns in data but starves for clarity.

PRAXIS was born from a single observation: the smartest organizations in the world still make critical decisions using fragmented dashboards, siloed teams, and gut instinct dressed up as strategy.

We asked a different question: What if intelligence wasn't a tool you opened, but a system that moved with you?

PRAXIS is the answer. An adaptive AI orchestration layer that sits between your data, your teams, and your decisions, turning **complexity** ***into clarity*** in real time.

We don't replace human judgment. We accelerate it.

THE PROBLEM WE SOLVE

$3.4 trillion

spent on technology annually

73%

of executives say they still lack the insight they need at the moment of decision.

The gap isn't data. It's orchestration.

MISSION

Build intelligent systems that orchestrate enterprise decisions with speed, clarity, and precision.

VISION

A world where every organization operates at the speed of insight, not the speed of meetings.

VALUES

01	Clarity over complexity	We make the complex understandable so decisions become natural.
02	Precision with purpose	We design and build with intent—every decision, every line, every outcome.
03	Adaptive by design	We evolve with change so our systems and customers stay ahead.
04	Trust through transparency	We earn confidence by being clear, consistent, and accountable.
05	Human advantage	We amplify human judgment to achieve outcomes machines alone cannot.

THE SAGE

Authoritative but approachable
We lead with expertise and clarity, communicating with empathy and respect.

Analytical but human
We analyze deeply and communicate clearly, always connecting to real human impact.

Calm under pressure
We bring clarity in complexity and composure in uncertainty.

ARCHETYPE SPECTRUM

PRAXIS is anchored in the Sage archetype, with a strong secondary influence from the Magician.

PERSONA 01:

THE STRATEGIC OPERATOR

VP of Operations | Enterprise SaaS

Age 38-48 | 2,000+ employees

- 60% of week in meetings
- 12+ dashboards
- Reactive not proactive

> *"Give me the insight I need before the meeting, not after it."*

CHANNELS

LinkedIn | Gartner | Peer referrals

PERSONA 02:

THE DATA-DRIVEN EXECUTIVE

Chief Strategy Officer | Financial Services

Age 45-55 | Board-level influence

- Dashboards show past not future
- $50M decisions on instinct
- Too much data, not enough clarity

> *"Show me the recommendation and show me why."*

CHANNELS

Board reports | McKinsey/BCG | WSJ | Private networks

FOR

enterprise leaders

who need to make high-stakes decisions
faster and with greater confidence,

PRAXIS IS

PRAXIS

is the AI orchestration platform that transforms
fragmented data into clear, actionable intelligence,

UNLIKE

unlike

traditional BI tools and standalone AI products
that create more dashboards without creating more clarity.

Others show you data.

PRAXIS
shows you what to do with it.

Others build dashboards.

PRAXIS
builds decision infrastructure.

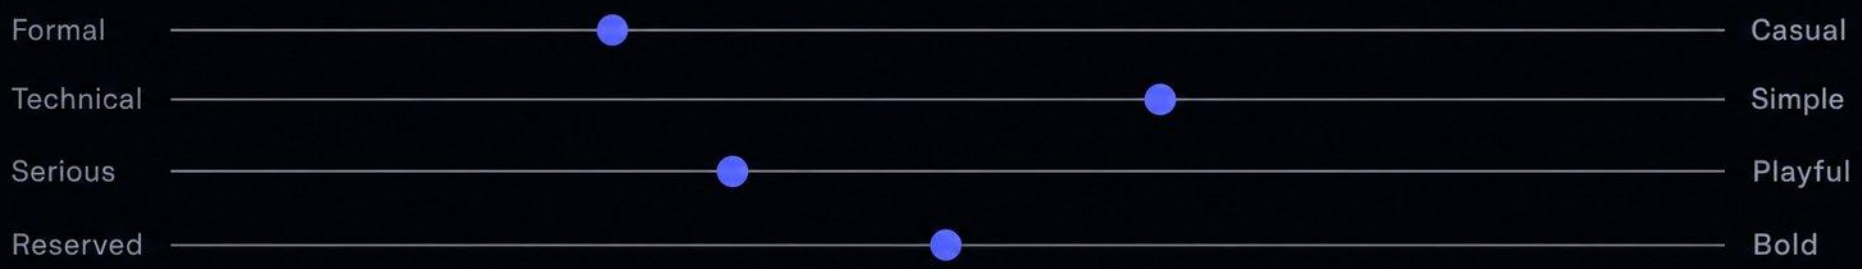
Others promise insights.

PRAXIS
delivers orchestrated intelligence.

HOW PRAXIS SPEAKS

Clear | Confident | Calm | Human

TONE SPECTRUM



DO SAY

"Your Q3 pipeline shows three risks that need attention this week."

Here's what the data suggests, and here's what we'd recommend."

DON'T SAY

~~Leverage our cutting-edge AI to unlock synergies."~~

~~Are you ready to 10x your decision-making?"~~

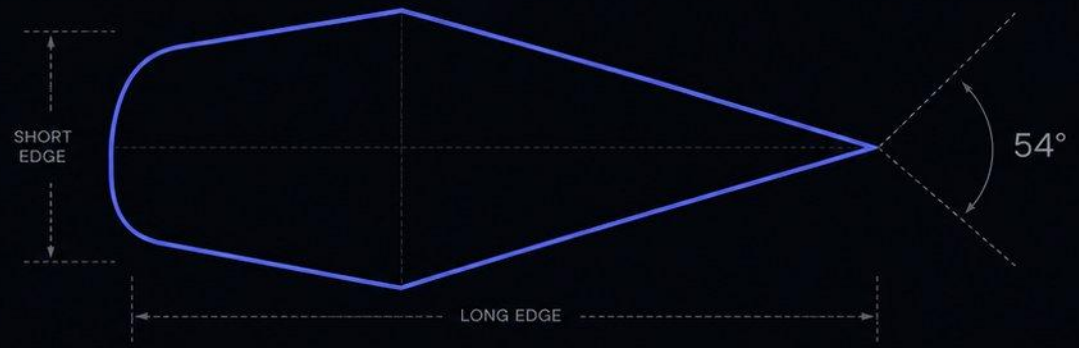
USE

AVOID

THE CONVERGENCE

The Convergence is a geometric frame element derived from the two intersecting angular planes in the PRAXIS logo mark. It represents the moment fragmented data becomes unified insight.



HOW IT'S USED

The Convergence adapts to multiple applications across the brand system.

AS A FRAME

Frames content with focus and directional intent.

AS A PATTERN

Creates a distinctive texture at 5–10% opacity.

AS A DIVIDER

Fragmented data lives in silos.

Unified intelligence drives decisions.

Separates sections with clarity and brand recognition.

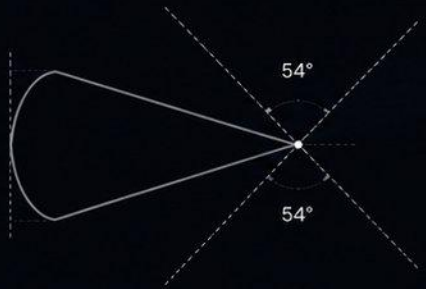
AS A DATA HIGHLIGHT

Highlights key metrics and AI-generated insights.

CONSTRUCTION

Built from two rules:

1. Two lines intersect at a 54-degree angle
2. The intersection point is always the focal point of the composition



ANGLE

54°

Fixed angle derived from the PRAXIS logo mark.

STROKE WEIGHT

Stroke weight = longest edge / 80

CORNER RADIUS

Corner radius on softened vertex = shortest edge / 8

DO

- Use to frame hero content
- Use as a pattern at low opacity (5–10%)
- Scale proportionally
- Maintain the 54° angle relationship

DON'T

- Use as a logo replacement
- Fill with color (it's always a stroke or subtle fill)
- Rotate beyond 180°
- Use at sizes smaller than 24px
- Apply to every element (restraint is key)

DO

1

Use the logo with proper size and clear space.

2

Use approved colors with strong contrast.

Intelligence in motion.

AI orchestration for enterprise decisions.

- Signal White #F5F5F7
- Electric Indigo #6366F1
- Ash #71717A

3

Use proper typography hierarchy.

Make better decisions, faster.

PRAXIS orchestrates data, AI, and people to deliver clarity at every decision point.

Discover PRAXIS →

SPACE GROTESK
Bold / 48px / -1%

INTER REGULAR
16px / 150%

INTER MEDIUM
14px / 0%

DON'T

1

Don't stretch or distort the logo.

2

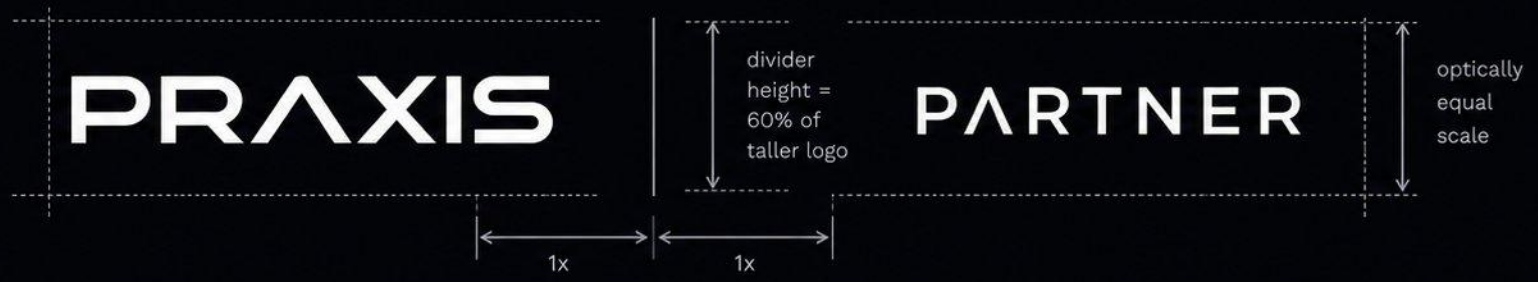
Don't place the logo on busy or distracting backgrounds.

3

Don't use mixed fonts, poor hierarchy, or gradients.

HORIZONTAL LOCKUP DIAGRAM

PRAXIS always appears on the left. A thin vertical divider separates the two logos with clear space on either side.



COLOR ADAPTATION EXAMPLES

1. **Preferred** — Both logos in Signal White on Void Black
2. **Option 2** — PRAXIS in Signal White, partner logo in its brand color on Void Black
3. **Option 3** — Both logos in their respective brand colors on neutral background
4. **Print fallback** — Both logos in single color (black) for print constraints

DO

Correct pairing with proper order, spacing, divider, and balanced scale.

DON'T

Avoid these common co-branding mistakes.

- Never apply partner colors to the PRAXIS logo.
- Never allow the partner logo to visually overpower PRAXIS.

KEY REMINDER | PRAXIS is always on the left | Clear space = 1x logo mark width | Keep scale within 20% | Protect both brands | When in doubt, simplify

Intelligence in motion.

ELEVATOR PITCH

PRAXIS is an AI orchestration platform that turns fragmented enterprise data into clear, actionable decisions in real time.

ONE-LINER

We turn complexity into clarity for enterprise decision-makers.

KEY MESSAGES

1. Decision infrastructure, not dashboards.
2. See what matters. Act on what counts.
3. Intelligence that moves with your organization.
4. From fragmented data to orchestrated clarity.
5. The last platform between your data and your decisions.

BRAND PROMISE

Every interaction with PRAXIS will make your next decision clearer than your last.
